PROFESSIONAL SUMMARY

Senior AI/ML Architect with 12+ years of experience designing scalable machine learning systems and leading research projects in deep learning and NLP.

TECHNICAL SKILLS

- Machine Learning
- Deep Learning
- NLP
- Python, TensorFlow, PyTorch
- Distributed Systems
- Model Deployment & Monitoring

WORK EXPERIENCE

- **Senior AI/ML Architect**, InnovateAI Solutions
  2019 - Present

  Architected and deployed end-to-end ML pipelines, optimized models for production, and led cross-functional teams on AI research initiatives.

- **Research Scientist**, DeepThought Labs
  2014 - 2019

  Conducted cutting-edge research in NLP, published multiple papers, and contributed to open source ML libraries.

KEY PROJECTS

- **Real-Time Speech Recognition System**: *Developed and deployed a low-latency ASR system using Transformer models with 95% accuracy.*
- **Automated Document Summarization**: *Led research and implementation of abstractive summarization models deployed for enterprise clients.*

EDUCATION

- **Ph.D. in Computer Science (AI/ML)**, Stanford University (2014)
- **M.Sc. in Computer Science**, Stanford University (2010)
